Assignment 7: Using Software Libraries
Software Engineering for Scientists

Objectives: Become familiar with how to use software libraries for data analysis.

For this assignment you will commit your in-class work to a new personal repository.

Tasks:

1. Create a new repository for your in-class data analysis project.
2. Commit all of your work to that repo.
3. Make a small scientific presentation of your work. Write a few sentences in your README for each of the following.
    a. Introduction. What are you looking at?
    b. Results. What did you find? Include your plots.
    c. Methods. What steps did you take to get your results? Include the commands someone would run to make your plots from the downloaded data.
4. For this assignment please **adhere to best practices** but **do not include unit or functional tests**.
