# Assignment 8: Workflow Language
# Software Engineering for Scientists

**Objectives**: Become familiar with the snakemake workflow language.

This assignment will build off of the work done in Assignment 6, so use the same repository.

**Tasks**:

1. Move the workflow you used to a snakemake file.
2. Use variables and wildcards to expand the scope of your analysis from Assignment 6.
3. Update your analysis to include these additional plots.
4. Testing is an important part of good scientific software. Include in your README some ideas about how we could test our workflows?
5. Create a release from master tagged as 2.0
